Washington, DC 20250-3700

Dear Sir,

I would like to register my opposition to genetically engineered food. If this is done the public should be made aware by labeling so that we can chose whether we want to use these foods. Also bovine growth hormone should not be used in cows. If it is used people should know so that they can make informed decisions.

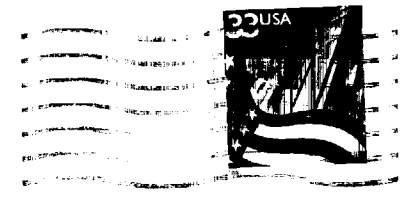

The public should be informed about what is being put in food or animals so that it can make informed decisions. Genetic engineering of food should not be done.

Thank you.

Sincerely,  
  
Audrey Hyatt
